

# Numuga<sup>®</sup>

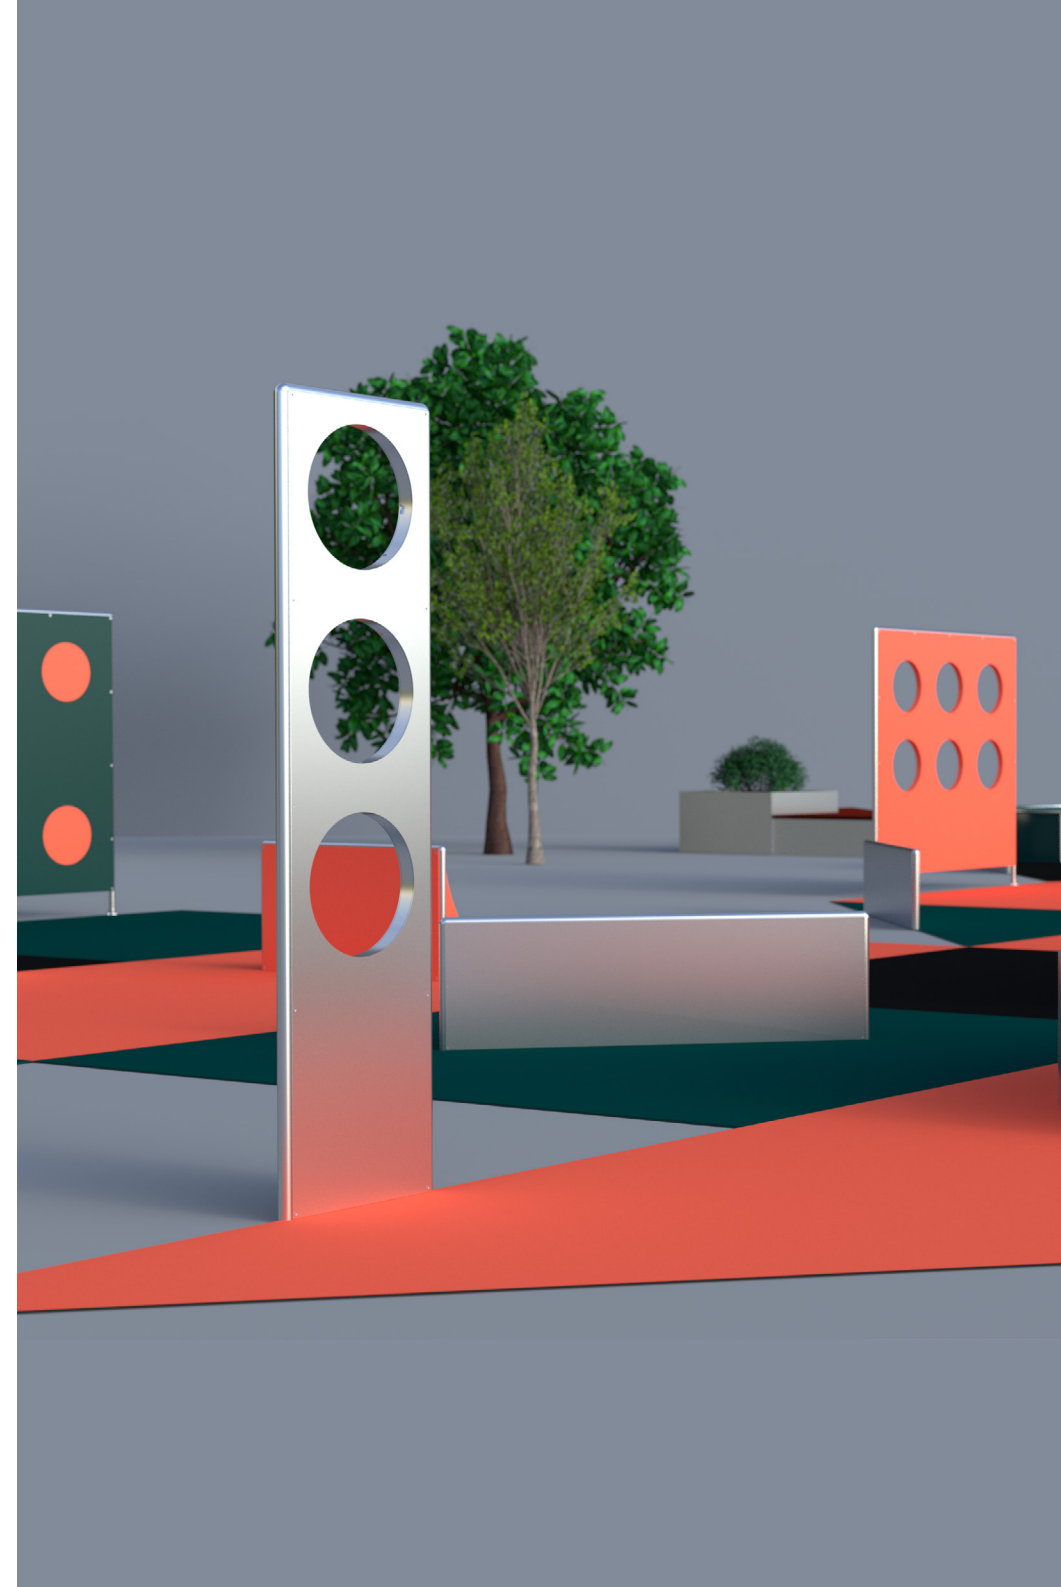

Welcome to Numuga

18-07-20

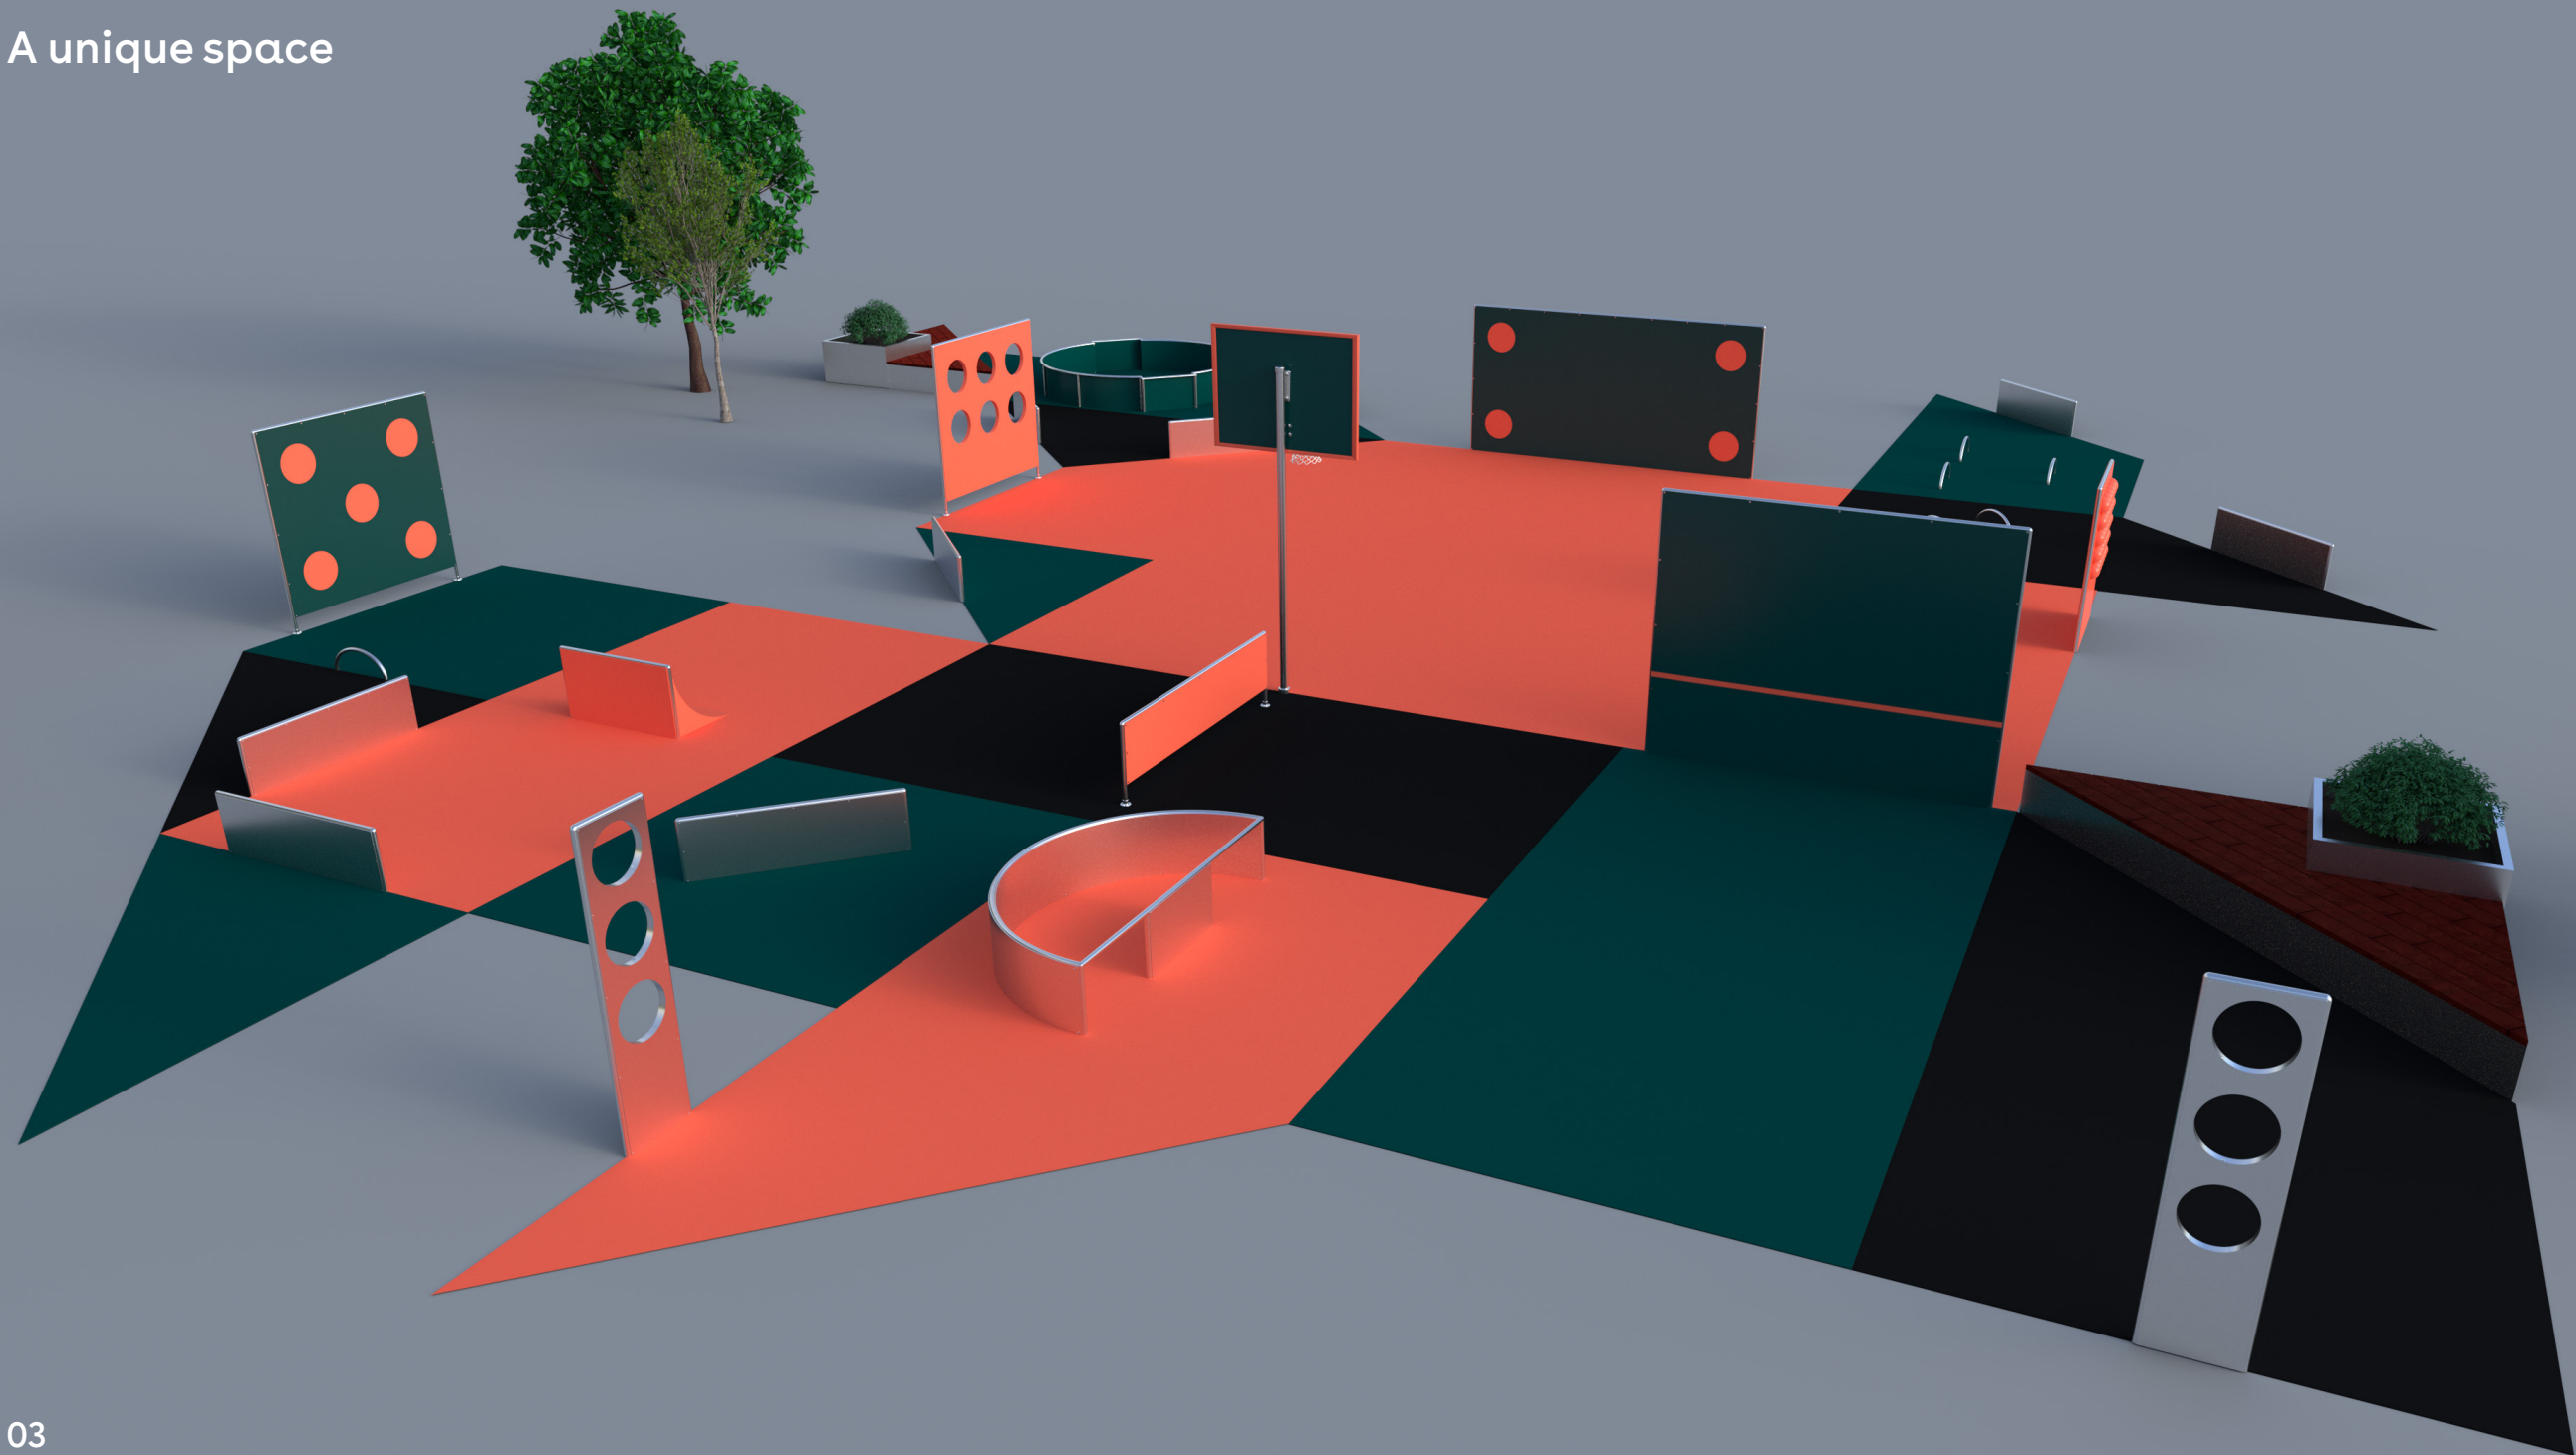

What is Numuga?

## We are Numuga – The New MUGA

The first true Multi-Use Games Area, with up to eight different sports available in the same space at the same time. Don't settle for a standard playground, work with us to create a bespoke and innovative games area, attracting users of all ages and abilities.

A unique space

## A change is needed

A simple 'kick about' isn't engaging the children and youths of today. Five-a-side pitches are empty around the world due to digital distractions, lack of variety and difficulties in arranging teams. In the UK, the child obesity epidemic is a big problem. The Government are pushing for increases in activity and public demanding for more engaging spaces.

20.1%

At age 10-11 in the UK, 20.1% are obese and a further 14.2% are overweight

40%

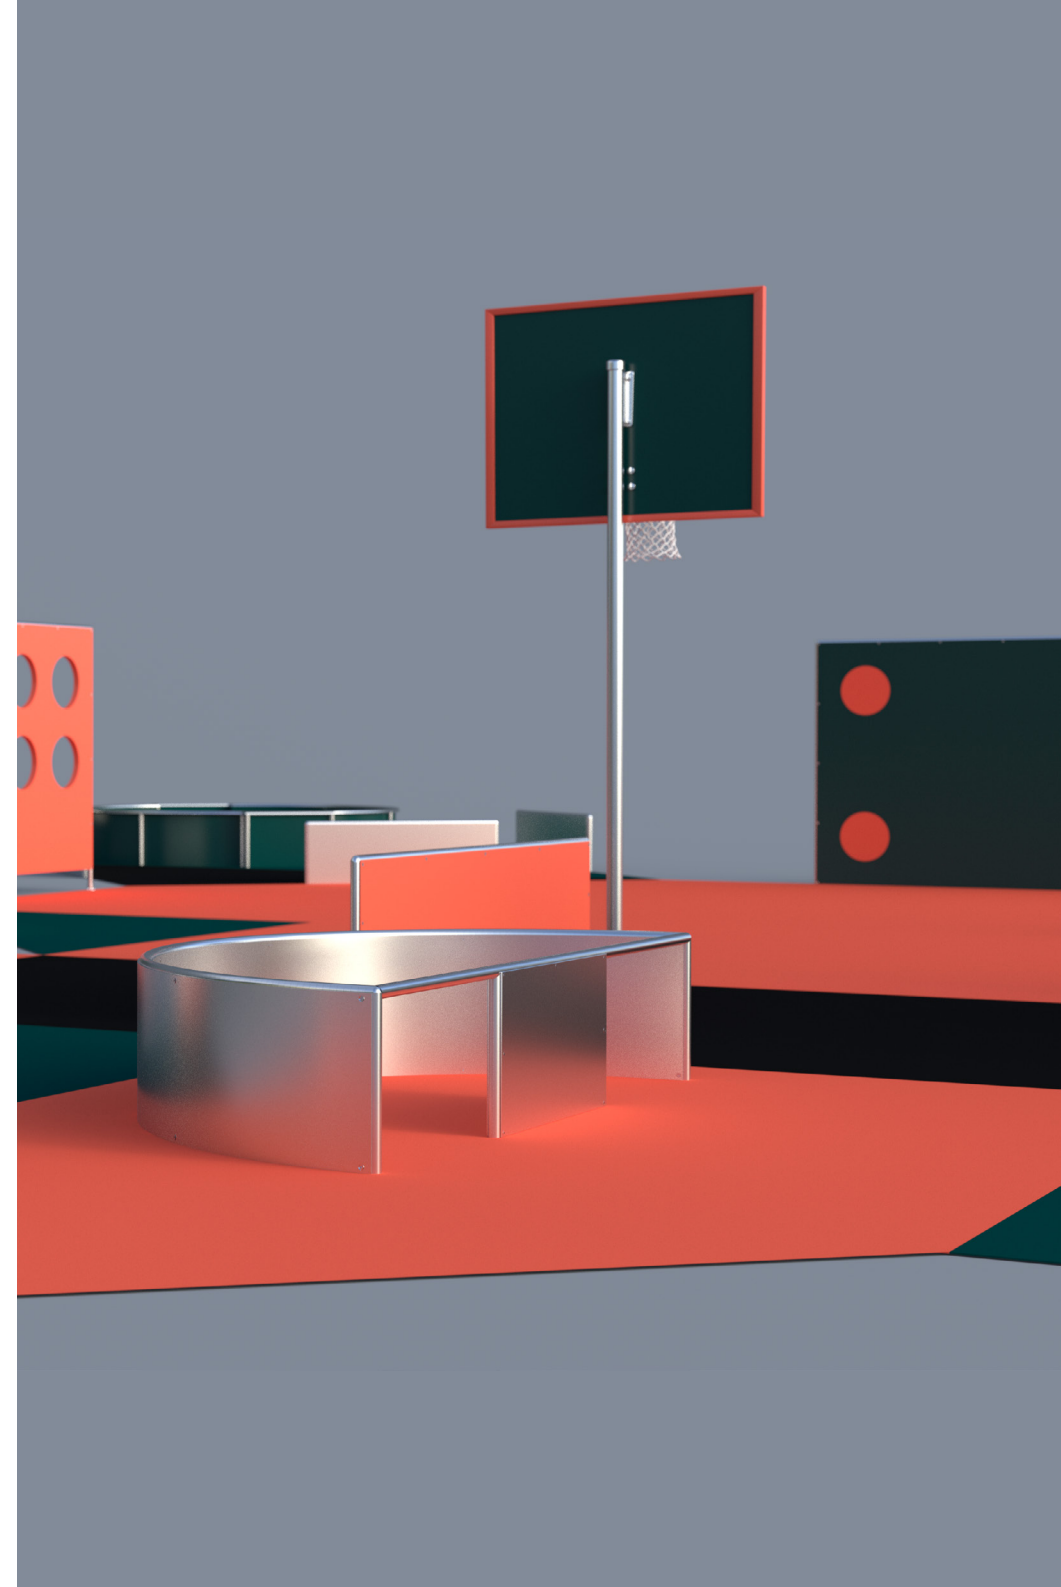

Only 40% of children prefer playing outside in comparison with 70% of parents

### Removing the barriers to play

By taking down the cage, we can create an open plan space that looks fun and inviting, rather than elite and intimidating. Another observation is, for sport to succeed in parks and playgrounds you generally need five or more people involved. This is unachievable most of the time, leaving traditional MUGA's unused. Numuga allows for games to be played with 1, 2, 3, 4 or 5+ people.

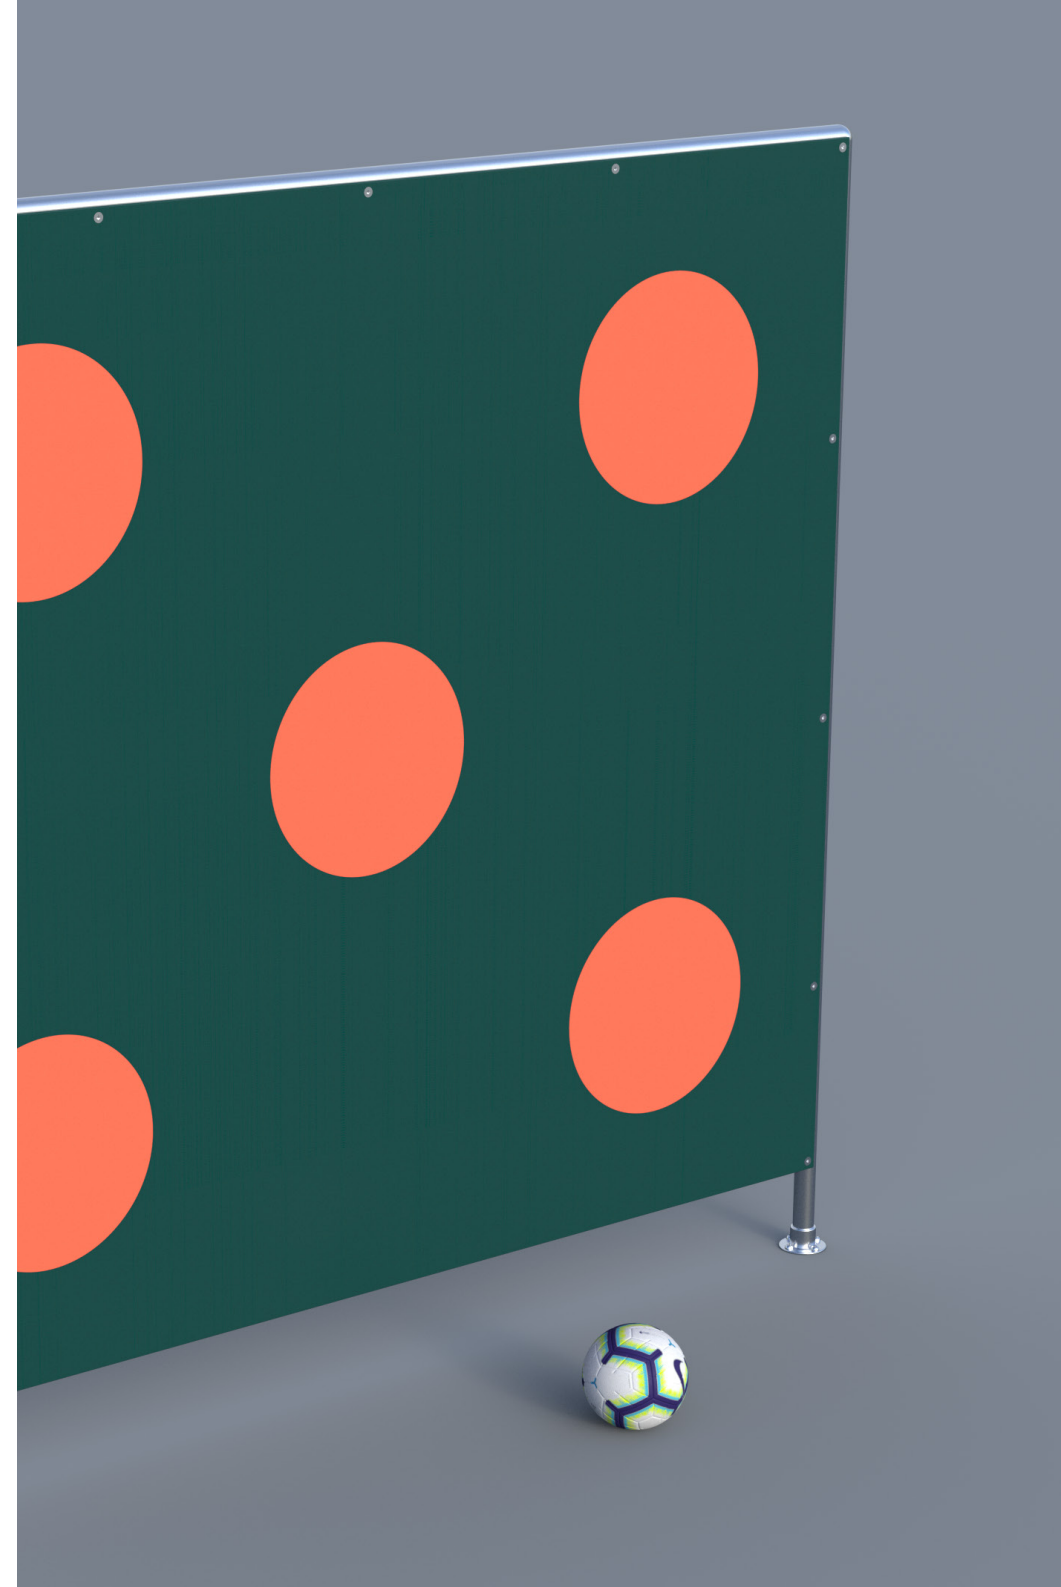

Maximise the use of your space –  
Play on the inside & outside of the zone

## Making sport more accessible

Numuga allows for a more freestyle type of play, where kids can learn the basics of sport without necessarily taking part in a 'match'. Learning how to pass, control, catch, throw and aim are key skills that can be transferred to multiple sports. Our spaces are a gateway into sport for beginners, as well as honing the skills of experienced players.

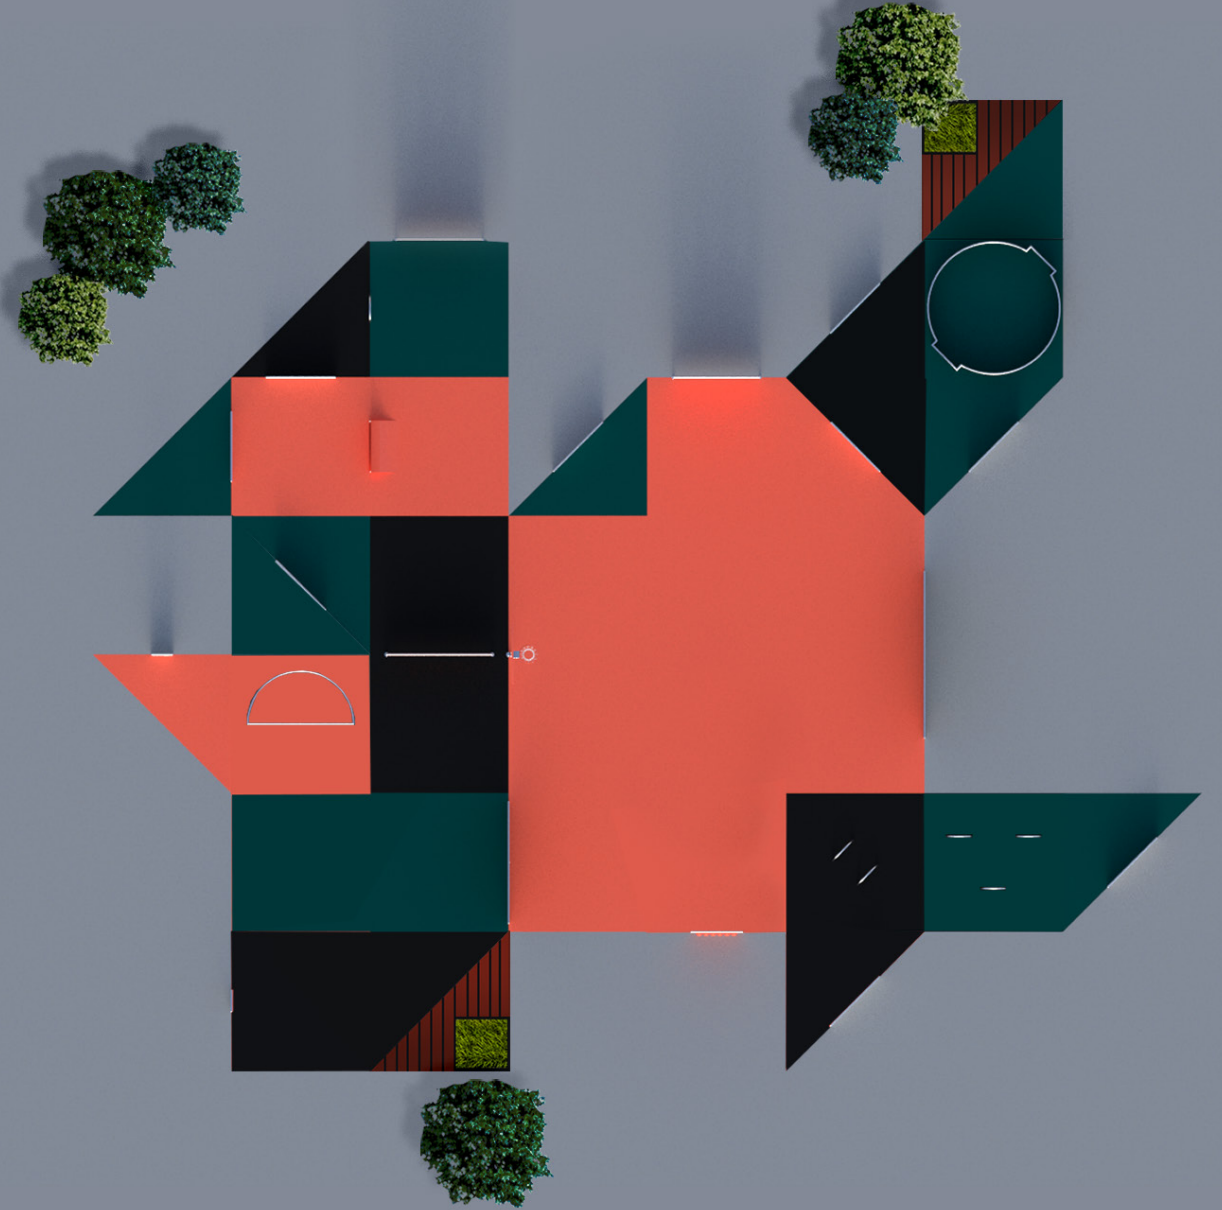

## Flexible layout

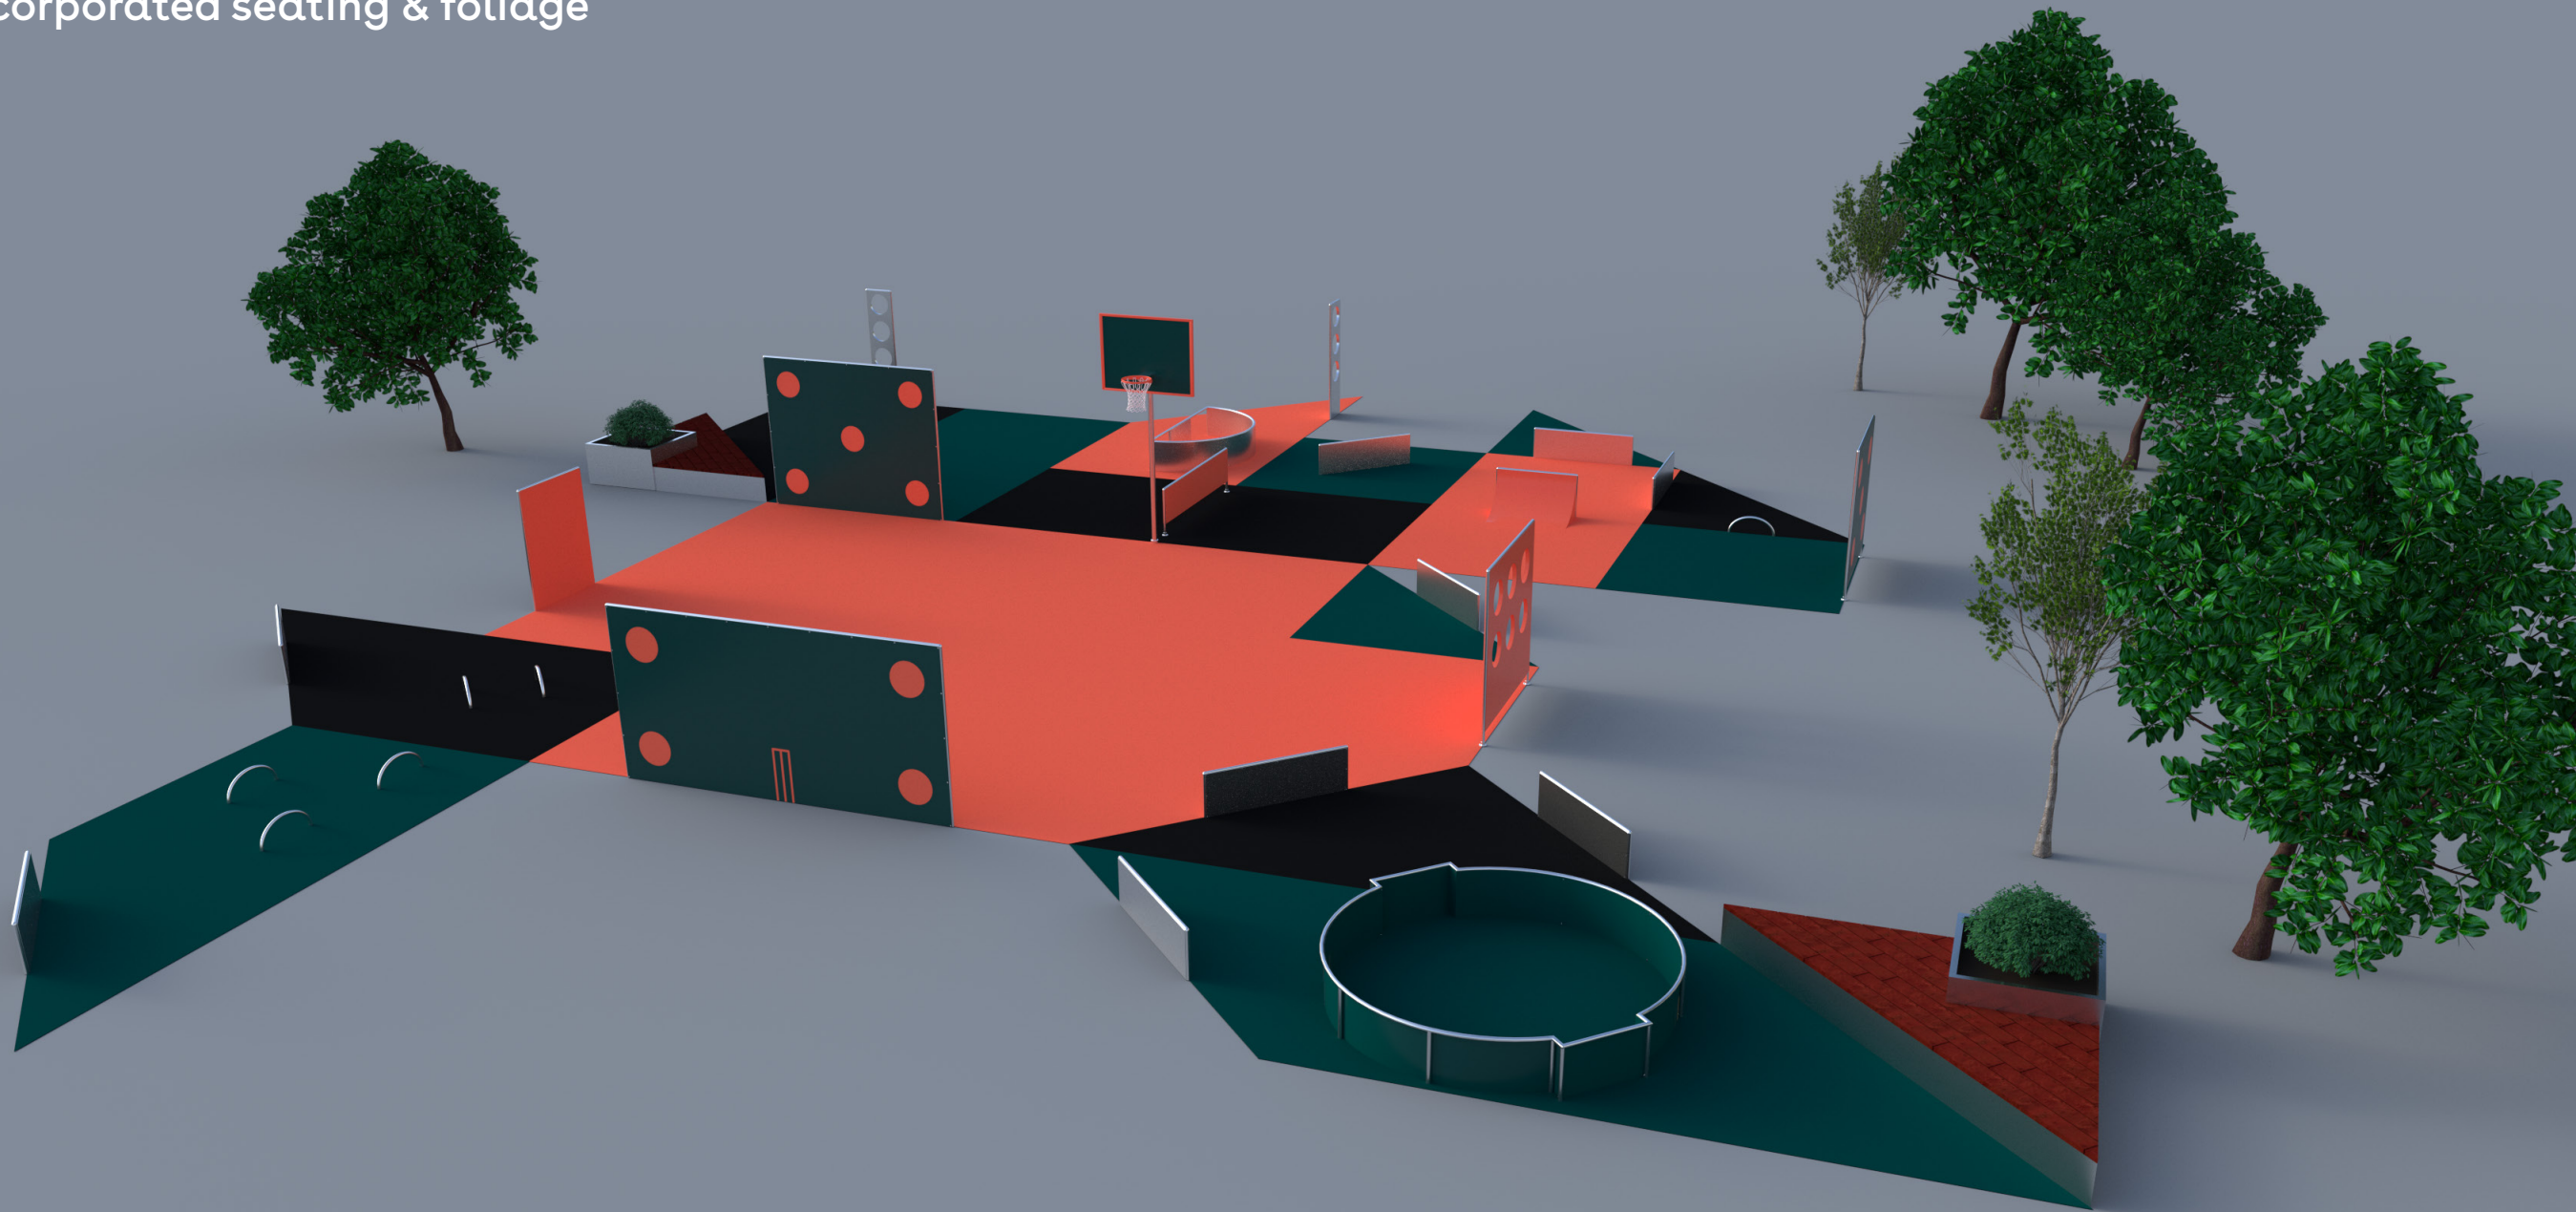

## Modular system

Numuga has a modular flooring system, which allows our equipment to seamlessly fit into all shapes and sizes of spaces. We offer this service as part of the end-to-end design, flooring, manufacture and installation package.

## Incorporated seating & foliage

## Who is it for?

Ideal customers for Numuga are councils, schools, universities, sports clubs and housing developers to increase general activity and provide a gateway into sport for younger generations.

## The benefits

- 
- ▲ It's universally unique, nothing similar on the market, new experience for user's
  - ▲ Increase participation and general activity within communities
  - ▲ Improve players technical ability:
    - Good for beginners
    - Hones skills of existing players
  - ▲ Provides a gateway into football & sport
  - ▲ Fun for all ages
  - ▲ An alternative to match format sport
  - ▲ You don't need large numbers to get the usage out of the space
